WHO WE ARE

Conceria Nuvolari is a family-owned company located in Monte Urano, Italy. The company is specialized in the production of high quality and exclusive leather.

The tannery offers a wide selection of leather types, including goatskins, cross-bred leather and sheep skin for shoes, clothing, soft & hard accessories. All the leathers are produced in conformity to the best protocols and leather regulations and Conceria Nuvolari is committed to invest in innovative technology to support sustainable developments while reducing its environmental impact. Advanced technologies are utilised to provide develop sustainable products without compromising the high quality of the leather.

Thanks to its structured organization and highly skilled technicians, Conceria Nuvolari is well known for the reliability and consistency of its products. This allowed the tannery to build up a large portfolio of clients within the luxury segment of the fashion industry, including well-known medium and large brands.

Conceria Nuvolari, which is synonymus of exquisite taste, is driven by a strong wish to use leather to communicate emotions.

“All the colours of the world in just one skin” is what Sara Santori, the tannery’s dynamic and strong-willed C.E.O, focuses the company’s strategy on, with sustainability being at its core.

— OUR SUSTAINABILITY AWARENESS

Our productions are in full compliance with sector legislations and in particular with all regulations for the protection and enhancement of the environment.

The themes of sustainability, circular economy, respect for the environment have today assumed a centrality in the fashion and luxury sector. Since 2017, our company Conceria Nuvolari has been in the search for more sustainable materials, to obtain a leather product that could meet the needs of a transforming market.

Nowadays the path taken has led us to be among the first companies to have experimented a method of tanning with the lowest level of heavy metals, and free from hexavalent Chromium.

For Conceria Nuvolari environmental sustainability also means offer a more resistant leather so that the final products can have an high durability.

With Nature-L® we managed to achieve the sustainability issue: indeed Skin Goat® represents our attention to the person's health and wellbeing in terms of footwear and clothing's transpirability and comfort.

— CHARACTERISTICS OF SKINGOAT®

SKINGOAT® is a patent (Micropore System Natural Transpiration) that protects a manufacturing process developed thanks to our exclusive know-how.

It is an important technological innovation aimed at achieving high levels of breathability, thermoregulation and comfort in leather articles mainly produced for the footwear industry and clothing.

This production procedure is totally natural and does not use any chemicals.

SKINGOAT® leathers are in good demand all over the world among shoe groups producing long-lasting, shoes and clothing.

This article combines the traditional look of a goat/sheep with a unique and enhanced breathability.

Breathability is not only an important requirement in leather products, but it's even more so in shoe production and clothing.

SKINGOAT® therefore perfectly meets final consumers' expectations as regards skin-care and high comfort in terms of breathability (perspiration, bad smells and so on).

In summary today SkinGoat® is natural leather with a very high breathability, which is achieved in a simple, effective, reliable and cheap way.

This unique treatment doesn't change its look but rather conveys an elegant and customizable design.

#1 CHARACTERISTICS OF SKINGOAT®

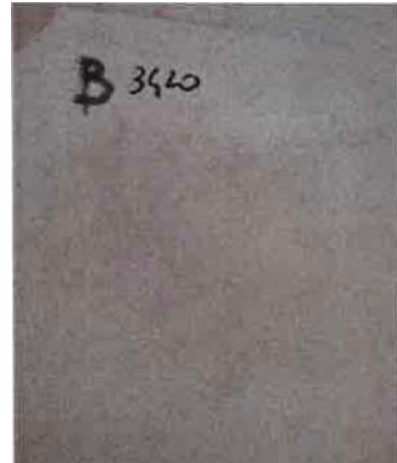

SkinGoat® leathers have passed the standard requirements for abrasion resistance, colour fastness, grab strength, and dry and wet crocking for footwear and fashion needs.

We constantly renew our wide range of colors adding the must-have trendy colors of the season; this article can also be customized with finishes required by customers.

WATER VAPOUR PERMEABILITY AND ABSORPTION

Samples to test: ART. SKIN

Opinions and interpretations not subject to ACCREDIA.

COMPONENT	PARAMETER	REQUIREMENTS (UNI CEN ISO/TR 20882:2007 Linings for men's town footwear)	EVALUATION
LINING	Water vapour permeability and absorption	WVP \geq 2,0 mg/cm ² h	PASS

DETERMINATION	METHOD	RESULTS
Water vapour permeability and absorption	EN 13515:2001	Water vapour permeability (WVP) = 16,0 mg/cm ² h

The reported expanded uncertainty is based on a standard uncertainty multiplied by a coverage factor $k=2$, which for a normal distribution provides a level of confidence of approximately 95%

THE EVOLUTION

COMBINATION OF INNOVATIVE PROCESS

All the characteristics of SkinGoat® plus biodegradability metal-free Nature-L®

All the characteristics of SkinGoat® plus the softness of Allure

All the characteristics of SkinGoat® plus the high resistance and antibacterial property of graphene leather

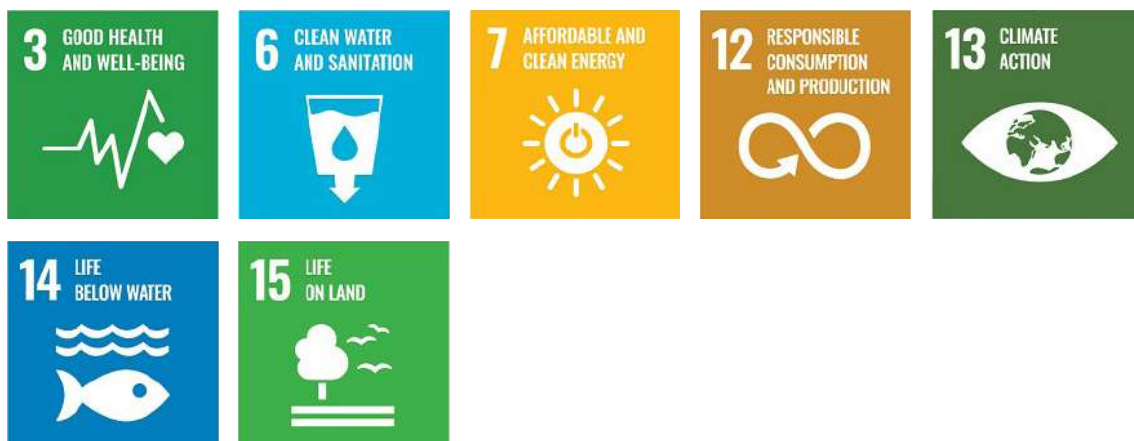

#2 OUR SUSTAINABLE DEVELOPMENT GOALS

The Sustainable Development Goals are the blueprint to achieve a better and more sustainable future for all. They address the global challenges we face, including those related to poverty, inequality, climate change, environmental degradation, peace and justice. The 17 Goals are all interconnected, and in order to leave no one behind, it is important that we achieve them all by 2030.

The Sustainable Development Goals are vital for a recovery that leads to greener, more inclusive economies, and stronger, more resilient societies.

We are committed to achieve the following Sustainable Development Goals:
